

AJOY A G

Security Engineer | Product Security | Cloud Security | Security Automation

ajoyag.work@gmail.com • ajoyag.in • linkedin.com/in/ajoyag • +91 6379243495

PROFESSIONAL SUMMARY

Security Engineer with hands-on experience building enterprise security automation, improving cloud security posture, and securing modern enterprise environments. Experienced with Microsoft Defender, Intune, Azure, endpoint security, vulnerability remediation, and PowerShell automation in large-scale enterprise environments. Passionate about Application Security, Product Security, Cloud Security, and secure software engineering, with a strong focus on building scalable security solutions rather than only identifying vulnerabilities.

EDUCATION

Mahindra University, Hyderabad

Bachelor of Technology in Mechatronics Engineer

Expected Graduation: August 2027

Relevant Coursework: Information Security and Risk Assessment | Data Structures | Machine Learning

PROFESSIONAL EXPERIENCE

TATA INSIGHT AND QUANTS – DIVISION OF TATA INDUSTRIES | Information Security Engineering Intern

Bengaluru, Karnataka | On-Site | June 2026 – July 2026

Core Technologies: Microsoft Intune, Microsoft Defender for Endpoint, Microsoft Defender XDR, Microsoft Entra ID, Microsoft 365 Security, Microsoft Secure Score, Azure, PowerShell, Microsoft Graph API, Power BI, CIS Benchmarks, ISO/IEC 27001.

- Engineered enterprise security automation and endpoint hardening by implementing PowerShell-based remediation, Microsoft Defender Secure Score improvements, Intune security baselines, CIS Benchmarks, and vulnerability management across managed Windows environments.
- Strengthened cloud and identity security by administering and optimizing the Microsoft security ecosystem, including endpoint protection, device compliance, telemetry analysis, detection tuning, policy enforcement, and security monitoring to improve organizational security posture.
- Developed and documented enterprise security controls, standard operating procedures (SOPs), technical implementation guides, and third-party security due diligence processes, contributing to ISO 27001 compliance, vendor risk assessments, and security governance initiatives.

TATA ELECTRONICS | Information Security Engineering Intern

Hosur, Tamil Nadu | On-Site | June 2025 – July 2025

Core Technologies: PowerShell, Active Directory, Windows Security, Microsoft Defender, Vulnerability Assessment, Security Automation, Enterprise Endpoint Security, Phishing Simulation, CSV Reporting, Windows Administration.

- Engineered PowerShell-based security automation to audit Active Directory and enterprise Windows endpoints, enabling centralized security assessments across **1,000+ managed devices** and reducing manual audit effort by approximately **90%**.
- Performed enterprise vulnerability assessments, endpoint security reviews, and phishing awareness simulations to identify security gaps, improve user awareness, and support remediation across organizational systems.
- Developed automated security reporting and audit workflows, streamlining compliance verification, asset visibility, and security operations for large-scale enterprise environments.

LEADERSHIP & ACHIEVEMENTS

DUE DILIGENCE AND RISK ASSESSEMENT FOR 3RD PARTY VENDORS

Tata Insight and Quants – Division of Tata Industries, Bengaluru

- Developed a standardized third-party security due diligence framework, enabling consistent vendor risk evaluations and strengthening procurement security decision-making.

RESPONSIBLE DISCLOSURE

Mahindra University, Hyderabad

- Discovered and responsibly disclosed a critical **Insecure Direct Object Reference (IDOR)** vulnerability in the university ERP system, contributing to the remediation of an authorization flaw affecting sensitive student records.

SKILLS

TECHNICAL SKILLS

- Programming & Scripting:** Python | PowerShell | Go | Bash
- Cloud & Enterprise Security:** Microsoft Defender XDR | Microsoft Intune | Microsoft Entra ID | Microsoft Azure
- Application Security:** OWASP Top 10 | API Security | Threat Modeling | Vulnerability Management
- Enterprise Security:** Identity & Access Management (IAM) | Endpoint Hardening | Security Automation | CIS Benchmarks | ISO/IEC 27001
- Tools:** Git | Docker | Linux | Burp Suite | Wireshark | Nmap | Postman

CORE COMPETENCIES

- Security Engineering | Problem Solving | Risk Assessment | Technical Documentation | Cross-Functional Collaboration | Stakeholder Management | Project Ownership | Continuous Learning

CERTIFICATIONS

- **ISO/IEC 27001:2022 Information Security Associate™** – SkillFront – July 2026
- **Data Visualisation: Empowering Business with Effective Insights** – Tata Group (Forage) – July 2026
- **Cybersecurity for MSMEs: Risks, Challenges & Best Practices** – CERT-In – June 2026
- **Qualys Enterprise TruRisk™ Platform Foundation** – Qualys – July 2025
- **Qualys Vulnerability Management (VM) Foundation** – Qualys – July 2025
- **API Security Fundamentals '25** – APIsec University – April 2025
- **Cyber Security Operations** – Datacom (Forage) – Feb 2025

PROJECTS

CLOUDSCALE TECHNOLOGIES – ENTERPRISE SECURITY ENGINEERING SIMULATION

Self-Made Project | August 2026 – Present

Azure | AWS | Microsoft Defender XDR | Microsoft Sentinel | Entra ID | Docker | Kubernetes | Terraform

- Designed and implemented an end-to-end security program for a simulated global SaaS enterprise, covering **Identity & Access Management, Cloud Security, Product Security, Detection Engineering, DevSecOps, Security Governance, and Incident Response**.
- Built production-style security solutions including **Zero Trust architecture, Infrastructure as Code, Microsoft security stack integrations, security automation, detection rules, and cloud security controls** aligned with enterprise best practices.
- Developed security documentation, threat models, architecture diagrams, implementation guides, incident response playbooks, and compliance artifacts based on **ISO/IEC 27001, CIS Benchmarks, SOC 2, PCI DSS, and HIPAA**.

Portfolio: 25+ interconnected repositories demonstrating enterprise-scale security engineering across cloud, identity, platform, application, governance, and security operations.

ENTERPRISE APPLICATION LIFECYCLE MANAGEMENT PLATFORM (EALMP)

Tata Insight and Quants – Division of Tata Industries, Bengaluru | June 2026 – Present

Go | React | PostgreSQL | Docker | Kubernetes | Microsoft Entra ID

- Designed and developed an enterprise platform to manage the complete application lifecycle, integrating **application inventory, Secure SDLC, risk classification, vulnerability management, compliance validation, and approval workflows**.
- Implemented **RBAC, Microsoft Entra ID authentication, audit logging, security approvals, and Zero Trust access controls** for secure application governance.
- Integrated **SAST, dependency scanning, secret detection, SBOM generation, policy validation, and CI/CD security gates** to enable secure software delivery aligned with **OWASP ASVS and Secure SDLC**.

Features: Secure SDLC, DevSecOps, Application Portfolio Management, Security Scorecards, Compliance Dashboard, Audit Trails

ENTERPRISE THIRD-PARTY SECURITY DUE DILIGENCE & VENDOR RISK MANAGEMENT PLATFORM

Tata Insight and Quants – Division of Tata Industries, Bengaluru | June 2026 – July 2026

Go | React | PostgreSQL | Microsoft Entra ID | Azure | Power BI

- Engineered an enterprise platform automating **vendor onboarding, third-party security assessments, evidence collection, risk scoring, remediation tracking, and executive reporting**.
- Implemented configurable assessment workflows aligned with **ISO/IEC 27001, NIST CSF, CIS Controls, SOC 2, GDPR, DPDP, HIPAA, and PCI DSS** for standardized vendor evaluations.
- Built **vendor lifecycle management, document repositories, audit trails, compliance dashboards, approval workflows, and role-based access control** to strengthen enterprise governance.

Features: Vendor Risk Register, Security Questionnaires, Compliance Mapping, Risk Heatmaps, Executive Dashboards, Remediation Tracking

ENTERPRISE SECURITY AUDIT AUTOMATION

Tata Electronics, Hosur | June 2025 – July 2025

PowerShell | Active Directory | Microsoft Defender | Windows

- Engineered a PowerShell-based enterprise audit automation solution to collect and analyze security posture across **1,000+ Windows endpoints**, reducing manual audit effort by **90%**.
- Automated endpoint inventory, security configuration validation, Active Directory auditing, and centralized reporting to streamline enterprise security assessments.
- Implemented structured logging, offline device synchronization, retry mechanisms, and CSV-based reporting to improve audit reliability and operational efficiency.

Features: Endpoint Inventory, Active Directory Auditing, Security Configuration Validation, Automated Reporting, Enterprise Asset Visibility
